This is great. No comments although CZARA currently is a moving target...

**Subject:** Oregon CWA Program Summary

Hi Everyone,

I'm long overdue, but here's a first draft of the Oregon CWA Program Summary from our meeting a few weeks ago. I kept it very simple with the idea that we were only highlighting what areas we're going to push on Oregon in the coming year. You'll see that I made rankings completely based on my own opinion, so we should definitely discuss more. I just wanted to throw it out there, so people could have a sense of what I had in mind, but this shouldn't be reflective of what we put out as a final assuming that every coordinator will want to edit. I'll send out a meeting invite or come by and talk to you to see what you think – is it on the money? Is it completely off? What should we tweak? Again, the purpose I was thinking about for this write-up is to be able to talk with Dan and Christine and find out if there are certain areas we as an Office want to push the State on more than other programs, so we have a sense of the support we can expect in the coming year for each of our programs. I personally would find it useful to know that Dan and Christine for instance, would want to prioritize the 303(d) Integrated Report and Permits over TMDLs, if push came to shove, or if they wanted to emphasize something else.

Anyway, see what you think. Feel free to drop by, email me, or let me know what you think. Ideally if you're able to do this by next week, Friday, 12/5, I'll send out an invite with comments after that.

Thanks, Everyone!
